USB Flash Drive

Your Data. Portable and Protected.

Star of the Observer 2010

Transport and Protect Your Data

With the new LaCie iamaKey, inventive storage meets data protection. The key-shaped design is functional and memorable, and the protection that the LaCie iamaKey offers makes it extremely reliable. Best of all, with its 4GB, 8GB, 16GB, and 32GB models, you can fit an enormous amount of data in a small flash drive.

USB 2.0 Interface

With the universal Hi-Speed USB 2.0 interface, iamaKey can be used with both a PC and Mac®. USB 2.0 not only offers universal compatibility and cross-platform convenience, but features a hot-pluggable connection and high-speed transfer rates, and is Windows® ReadyBoost™ compatible. Best of all, the iamaKey is backward-compatible with USB 1.1, so you can use it on any computer.

Sturdy and Reliable

With its eye-catching design, the iamaKey certainly stands out, but its connector (Gold SIP) is both water- and scratch-resistant, making it one of the most durable and thinnest USB keys on the market. Protective edges on the connectors ensure that you'll always insert the LaCie iamaKey properly, keeping it usable and safe.

Creative Design

A product of the 5.5 Designers firm, the LaCie iamaKey fits in your pocket, and on your keychain, letting you take your data with you wherever you go. Another new collectible product produced in conjunction with 5.5 Designers, the iamaKey is a usable, tough USB flash drive, but with a well-developed sense of fun. After all, "I am a Key".

- Sturdy metal key design; fits on a keyring
