

## LaCie 100 Series Monitors

With LaFrame\* for an enhanced visual experience

**Create It. Frame It.**

### ● VISUAL COMFORT AND FOCUS

The LaCie 100 Series LCD Monitors are designed to offer a revolutionary visual experience for digital professionals. The unique accessory delivered with each monitor, the LaFrame\*, ensures the best display for your digital documents. Mounted directly behind the monitor, LaFrame removes visual distractions out of your field of vision, a precious gain in visual comfort and productivity even in the busiest open-space corporate offices. You can now comfortably focus your full attention on your work.

### ● YOUR WORK STANDS OUT IN ITS BEST LIGHT

Whether for design work, layout or editing, the LaCie 100 Series Monitors ensure that digital documents are displayed in their best light. Thanks to the LaFrame, the discreet black casing of the monitor is framed with a special black cloth that was selected for its anti-reflective properties. It reduces glare caused by ambient light and makes your work prominently stand out.

### ● PREMIUM MVA PANEL TECHNOLOGY

The LaCie 100 Series LCD Monitors use Premium MVA (Multi-domain Vertical Alignment) LCD panel technology, which offers the beneficial combination of very high contrast ratios (up to 1000:1) and wide horizontal and vertical viewing angles of 170 degrees.

### ● EXPANSIVE OPTIONS & EXTRAS

Thanks to their flexible stand, these ergonomic monitors can be height-adjusted, tilted and swiveled to adapt to your work environment. They can also be used in conjunction with a desk clamp and extendable arm, allowing the display to be moved in every direction without taking up valuable desk space. Compatible with both PC and Mac workstations, they offer both analog (VGA) and digital (DVI) video interfaces.

- LaFrame\* for visual comfort and focus
- Promotes your work
- Industry-leading high contrast
- Tilt, swivel and height adjustments

\* Priority of FR patent application no. 06 01062 pending
