

# Sound<sup>2</sup> Speakers

DESIGN BY NEIL POULTON

Hi-Fi Quality Sound  
for Your Mac<sup>®</sup>,  
PC, or iPod<sup>®</sup>

## From LaCie and Cabasse

The LaCie Sound<sup>2</sup> Speakers are a collaboration between LaCie and Cabasse, one of the most respected sound-system companies in the world since 1950. With their sophisticated and advanced acoustic engineering, the Sound<sup>2</sup> Speakers represent a step up from previous generations of USB speakers, and most importantly, demonstrate that high-quality sound doesn't have to come at a high price.

## Designed for Sound

The appealing, vinyl record-inspired look of the Sound<sup>2</sup> Speakers is a product of world-renowned designer Neil Poulton, who has designed our successful LaCie FireWire speakers. Coupled with Cabasse's loudspeaker driver support, the LaCie Sound<sup>2</sup> Speakers add premium sound quality to computer systems or MP3 devices.

## Stunning Performance

With a Class D Digital Amplifier, magnetic shielding, a bass reflex system, and a 30W total peak system output, the Sound<sup>2</sup> Speakers provide sound that needs to be heard to be believed. Cabasse's own Wide Band Driver comes with the speakers, helping them to provide some of the best performance, at a great value.

## Dual-Mode Power

The Sound<sup>2</sup> Speakers' built-in USB cable ensures that you'll never lose it, and when you aren't using your speakers, you won't be left with a tangle of wires. In addition, you can choose between powering your Sound<sup>2</sup> Speakers through USB or the external power supply, giving you more options.

- Hi-fi quality sound engineered by Cabasse
- 30W power output\*
- Plug & play, driver-free for Mac and PC
- USB bus-powered; built-in cables

# Sound<sup>2</sup> Speakers

DESIGN BY NEIL POULTON

## Features

- Powerful and hi-fi stereo system
