

Sturdy, Solid Protection for Your Hard Drive

Keep Your LaCie Products Safe and Secure

Introducing the LaCie Cozy line of bags for your hard drives, a great new way to transport and protect your data and information. Designed by Sam Hecht, the LaCie Cozy provides a tough protective outer layer that makes carrying your drives a snap. Made of EVA, the outside of your LaCie Cozy is rigid enough to withstand the everyday bumps and bruises of the outside world, while its stylish exterior promotes the chic, stylish design that LaCie is known for around the world.

A Complete Range for Your Drives

With the two different sizes in the LaCie Cozy line, it's easy to find the one that's right for you. Choose from two sizes, both of which are compatible with most hard drives on the market. For example, our 2.5" bag is perfect for drives like the LaCie Little Disk, and our 3.5" bag is ideal for products like the LaCinema Classic. The LaCie Cozy is available in black, gray, and red. Whichever size you choose, you can be confident that your LaCie Cozy offers superior protection for your drive.

Flexible Accessory Pocket

While the LaCie Cozy has a rigid, tough exterior, its flexible outside pocket is perfect for carrying any peripherals, supplies, or accessories you may want to take along with you.

A Versatile Interior

With memory foam inside of the LaCie Cozy, your drive is protected from daily shocks and jolts. The extra pocket on the interior also lets you store and transport small accessories, such as cables.
