

# LaCie d2 DVD±RW Drive with LightScribe

USB 2.0

## Professional 22x DVD Drive

### LightScribe Disc Labeling

LightScribe is an innovative technology that allows you to burn silkscreen-quality labels directly onto CDs and DVDs with a laser instead of a printer. LightScribe uses a combination of your CD or DVD drive, specially coated discs, and enhanced disc-burning software to produce precise, professional labels. The result is an impressive iridescent image composed of art, text, or photos of your own creation.

### Compile Music, Photo, and Video Discs

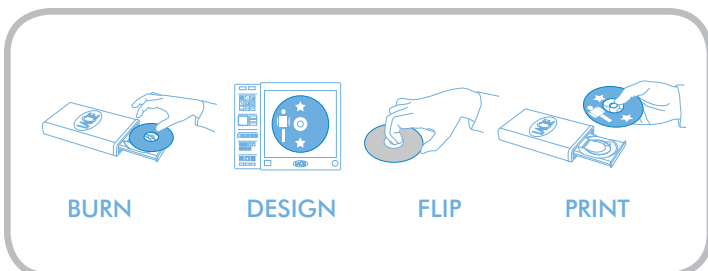

Back up valuable data, share photos, and archive MP3 libraries and MPEG-2 DVD video. With the ability to quickly store digital data on CD or DVD media, the LaCie d2 DVD±RW Drive allows you to burn up to 8.5GB\* or more than two hours of theater-quality video on large-capacity DVD. This rewritable drive features USB 2.0 for easy connection to your PC, and is compatible with Linux.

### Custom DVDs in Minutes

The LaCie d2 DVD±RW Drive features the fastest DVD record speed on the market in a sturdy design. Burn professional-quality, personalized DVDs with the included authoring software for Windows users. Import video and audio footage from your DV camcorder and burn projects onto DVD discs. Completed DVDs can then be played back on virtually any DVD player.

### Comprehensive Software Suite

Create totally customized DVDs with the bundled Easy Media Creator Suite 10 DVD/CD multimedia software for Windows® users. An easy-to-use interface allows you to piece together DVD movies in a matter of minutes. This all-in-one bundle solution includes LightScribe labeling software. (Linux\*\* users can download LaCie LightScribe Labeler software from our website for free.)

- Create and record your own custom CD/DVDs
- Store your photos, MP3s, and videos
- Design and print professional-looking labels
