

LaCie 5big Backup Server

DESIGN BY NEIL POULTON

Centralized Backup Appliance for Small Businesses

Back Up 10 PCs and 25 Macs | 10TB* | Gigabit Ethernet

The Right Backup Solution for Small Business

Delivering seamless, full-featured backup for up to 10 PCs and 25 Macs, the 5big Backup Server is designed for small businesses requiring a high-performance backup strategy that doesn't require an IT professional to deploy it. Offering robust performance, seamless setup, and the usability of Microsoft's storage software, the LaCie 5big Backup Server is a perfect solution for any small business with important data to protect.

Backup No Brainer

The 5big Backup Server is a professional backup solution for PC and Mac with the capability of backing up both data and system files automatically or manually. It features backup deduplication, centralized backup management, and workstation agent-free configuration. The 5big Backup Server will even back up files that are currently open. For Mac workstations, a professional-grade Time Machine® feature creates a dedicated directory for every backed up workstation, making file restoration from the client straightforward. Deduplication means that only one copy of a given file is saved to the 5big Backup Server for ultimate backup efficiency and storage usage. And for maximum data protection, you can even back up the 5big Backup Server's data onto an external hard drive via the USB or eSATA expansion port – truly enterprise-level capabilities within a desktop solution.

Rock-Solid Components

The 5big Backup Server's all-star system comprises a 64-bit Intel® Atom™ Pineview processor and 1GB of RAM, which delivers lightning-fast data processing for truly seamless backup. Powered by Microsoft WHS®, the user interface offers a familiar environment which can be accessed from any workstation. Data stored on the server are automatically protected against an unexpected drive failure. With up to 10TB of capacity scalable through USB and eSATA connections, the 5big Backup Server offers huge storage to back up all your office's workstations.

- Centralized file and bare metal backup for 10 PCs and 25 Macs
- Powered by high performance 64-bit Intel processor and Microsoft WHS
- Online file and full system restore
- Time Machine compatible
- Data protection against drive failure
- Up to 90MB/s data transfer rate

Minimum System Requirements

- Computer with an Ethernet network adapter
- Latest version of Windows XP®, Windows Vista®, Windows 7® for administration and SMB connections / Mac® OS X 10.4, 10.5, 10.6 / Linux 2.6 for SMB connections only
- Minimum free disk space: 600MB recommended
- Ethernet switch or router*
- Web browsers: Internet Explorer™ 7.0 / 8.0 / Firefox™ 3.0, Safari™ 3.0, or Chrome 2.0™ or higher

Box Content

- LaCie 5big Backup Server
- Ethernet cable
- External power supply
- DVD-ROM for Server Restore
- CD-ROM for PC Restore
- CD-ROM for Connector Agent
- Getting Started Guide
- Drawer key

Restore All the Way to Bare Metal

The 5big Backup Server offers file-level and bare metal restore capabilities. Whether users experience accidental file loss or require an entire system to be restored, the 5big Backup Server ensures all data can be recovered. If a workstation experiences a hard drive failure, a bare metal restore can completely rebuild its data – through the network – from system components to user files, with a minimum downtime.

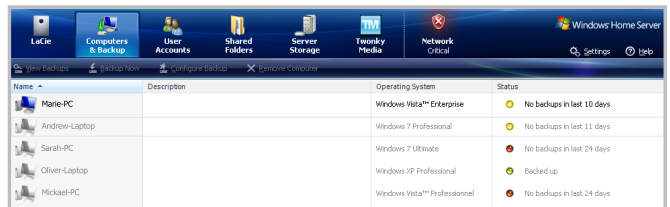

Environment- and Desktop-Friendly

Despite its high performance, the 5big Backup Server offers eco-friendly features. Its casing is made from fully recyclable aluminum, and while multi-disk systems can consume a lot of power, the 5big Backup Server power supply is rated at an amazing level V. Through the Microsoft WHS interface, you can choose low power usage profiles in order to strike a balance between data availability and power use. Additionally, the LaCie 5big Backup Server houses an ultra-quiet Noctua fan, allowing you to place the product wherever you choose – including on a desktop.

Deploy and Manage Effortlessly

Setting up the 5big Backup Server is as easy as connecting it to your LAN and configuring backup. With minimal setup, you can initiate automatic backups of all the PCs and Macs on your network, thereby centralizing backed up data and taking human error out of the equation. Server management is easy thanks to a user-friendly interface, through which you can set up public or private shares, access the 5big Backup Server remotely, and even monitor the basic health of the network.

Name	Description	Operating System	Status
Marie-PC		Windows Vista™ Enterprise	No backups in last 10 days
Andrew-Laptop		Windows 7 Professional	No backups in last 11 days
Sarah-PC		Windows 7 Ultimate	No backups in last 24 days
Oliver-Laptop		Windows XP Professional	Backed up
Mickael-PC		Windows Vista™ Professional	No backups in last 24 days

**ADVANCE
CARE OPTION**

Premium 3-Year Warranty

The LaCie 5big Backup Server comes with a 3 Year Limited Warranty. For superior service, it also comes with an optional Advance Care Option, which can be purchased separately online within 30 days of the purchase date. Under the Advance Care Option, LaCie will immediately swap out the product without it needing to be returned first for minimal interruption of your workflow. LaCie covers all freight costs. Availability depends on the sales area. See www.lacie.com for details.
