Product Overview

For 4K and other bandwidth-hungry workflows, the LaCie 5big is the perfect solution. Thunderbolt 2 interface speeds, up to 40TB of capacity, and secure hardware RAID 5/6 bring the ideal combination of features for creative professionals. Additionally, the LaCie 5big features dual Thunderbolt 2 ports for daisy chaining and an effective cooling system for quiet operation and long-term reliability. A version with Enterprise Class drives totalling 40 TB provides the ultimate accessibility, reliability and robust performance and a five-year warranty.

Use Cases

- Digital Content Creation: Thunderbolt 2 bandwidth lets creative pros shave time off their workflows. Post-production pros can work directly from RAW files in Apple® Final Cut Pro® or Adobe® Premiere®, getting full quality from footage and seeing edits in real time. Photographers will notice highly responsive browsing, even in archived libraries of thousands of RAW and edited images. And audio pros using Avid® Pro Tools® and other software will notice much smoother audio mixing.
- Backup: The combination of hardware RAID 5/6 and the Thunderbolt 2 I/O means incredibly fast backups while providing excellent speed and capacity. And hot-swappable disks and efficient cooling help ensure bulletproof data security.
- Desktop Storage: Speed, capacity of up to 40TB, and reliability make the LaCie 5big a perfect solution for storing both current and archived projects. These features also ensure there is no better way to expand capacity for the new Mac Pro®.

¹ These transfer rates were achieved using AJA System Test when connected to a Mac computer via the Thunderbolt 2 interface. Actual data rates may vary depending on operating environment and other factors, such as RAID mode, RAID configuration, and disk capacity.
