Digital You: Boosted. Only At Apple

Like a shot of espresso straight to your digital self, LaCie® Mobile SSD offers fast backup for the moments that matter most. With up to 2TB capacity, no photo is sacrificed. With wide compatibility, versatility isn’t a question. With a unique diamond-cut design, style is not overlooked. And with up to 540MB/s of go-go-go speed, no space or time is ever wasted.

Think Fast With an External SSD.

Collaborate seamlessly, browse photos smoothly, and edit video faster in apps like iMovie®, QuickTime®, Final Cut Pro®, and Aperture®.

- Edit from the drive with zero lag
- Transfer an hour of video or thousands of high-res images in less than a minute.1,2,3

Enjoy Robust Capacity.

In this era of external SSDs, you don’t need to sacrifice precious space. LaCie Mobile SSD gives you up to 2TB capacity.

- Keep up to 200K high-res photos.2
- Store up to 65 hours of videos.3

Lightweight. Heavy on Style.

For over 30 years we’ve proven that backup can be more than a tool—it can be an exquisite solution. We’re celebrating this expertise and commitment with an exclusive diamond-cut anniversary design.

- Space gray complements your Macbook®.
- All-aluminum design is lightweight yet solid.
- Diamond-cut edges reveal tone and texture.

Rest Easy With a 3-Year Warranty and Rescue Plan.

From the studio, to the office, to home, life happens. If disaster strikes, recovery of your data is vital. Our data recovery team has your back with a 95% customer satisfaction rating. If your drive needs replacing, our 3-year limited warranty means we’ll replace it at no extra cost.4

1 Data rates may vary depending on operating environment, interface, and capacity.
2 Based on the average image size of digital cameras (10MB).
3 On average, 1 hour of 4K 30fps compressed footage creates 30GB of data.
4 Eligible for 1 in-lab data recovery attempt during the term of coverage. For more information, visit lacie.com.

All other trademarks or registered trademarks are the property of their respective owners. When referring to drive capacity, one gigabyte, or GB, equals one billion bytes and one terabyte, or TB, equals one trillion bytes. Your computer’s operating system may use a different standard of measurement and report a lower capacity. In addition, some of the listed capacity is used for formatting and other functions, and thus will not be available for data storage. Quantitative usage examples for various applications are for illustrative purposes. Actual quantities will vary based on various factors, including file size, file format, features, and application software. Actual data rates may vary depending on operating environment and other factors, such as chosen interface and drive capacity.
